

Shaping the Future of Production Industries with Spire Essentials

An AI-Driven Business Software Platform

www.spire.solutions

The Problem

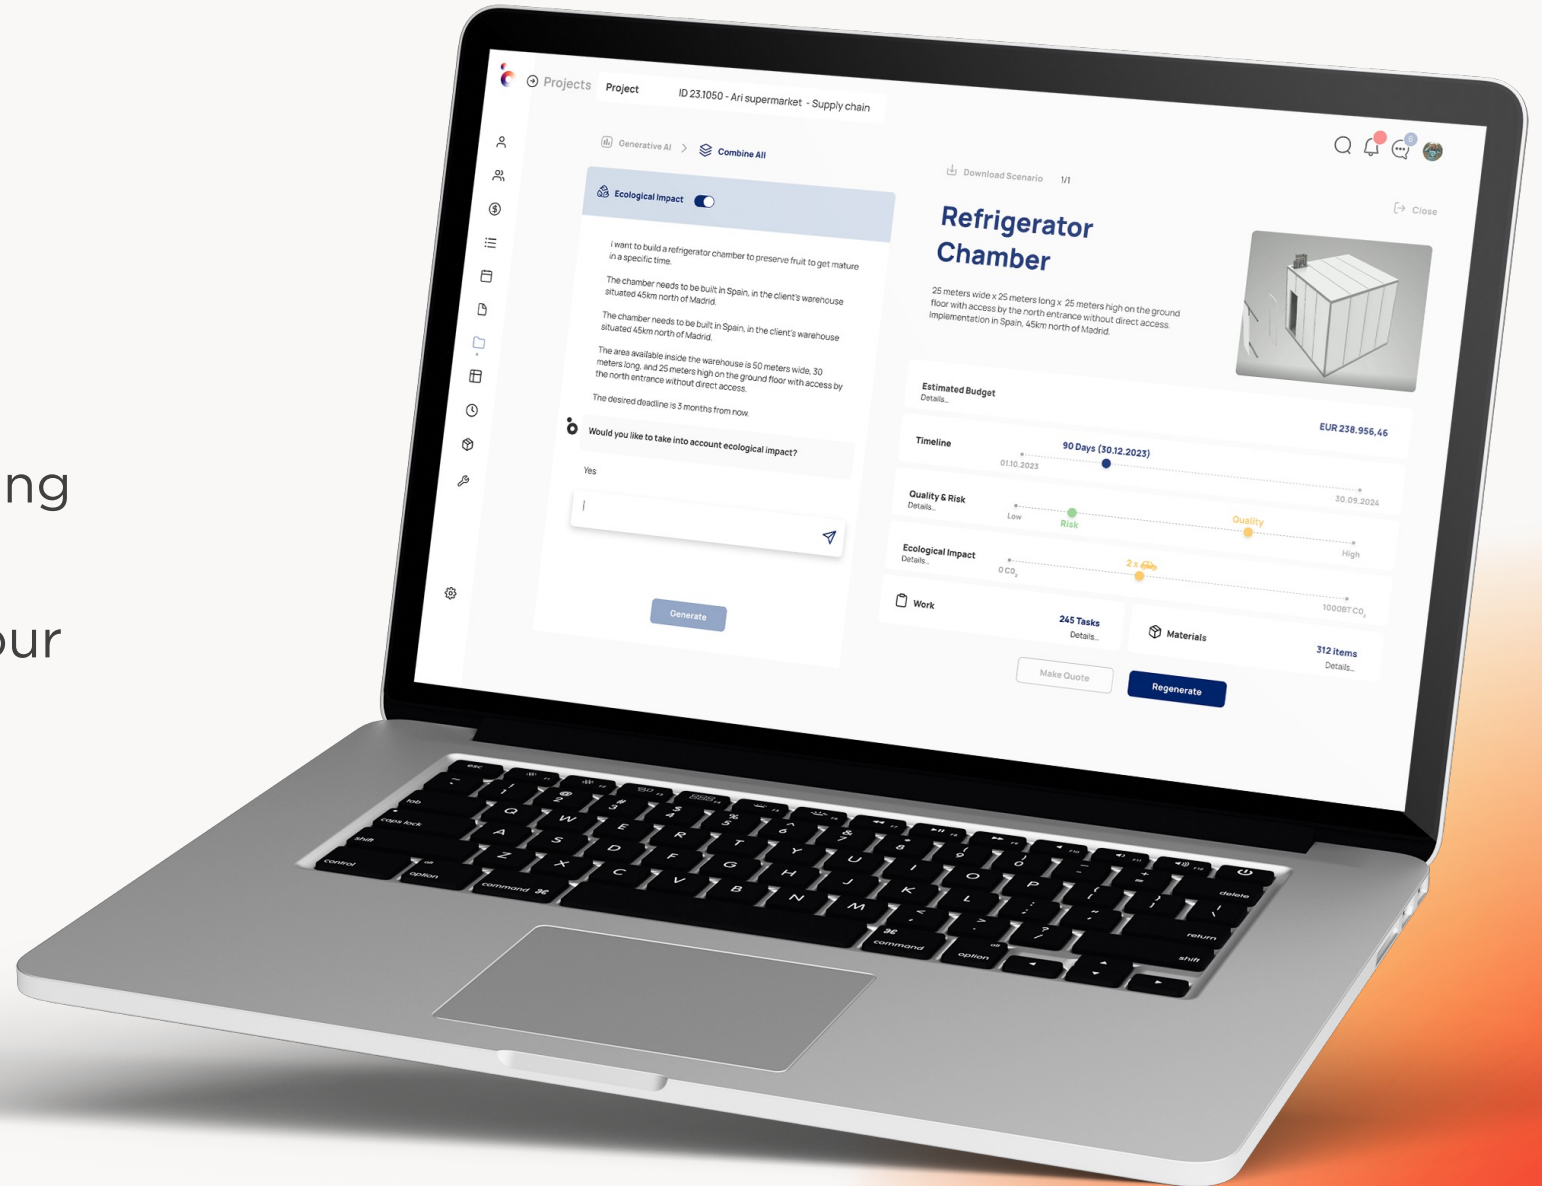

Production companies face the **laborious process** of project budgeting, creating timelines, and identifying suppliers **causing delays and resource drainage.**

The Solution

Generative AI for project budgeting processes allowing more space for innovative thinking, which improves your sales ROI.

The Solution

AI Building Blocks empower you to establish your goals, while the **Spire Essentials System** generates multiple scenarios for you to select the best-balanced project scenario:

Budget

Timeline

Risk

Footprint

How?

Set your criteria and get the best scenario in an instant.

Plus, alternative scenarios based on different benchmarks.

 Generative AI

Ecological Impact

I want to build a refrigerator chamber to preserve fruit to get mature in a specific time.

The chamber needs to be built in Spain, in the client's warehouse situated 45km north of Madrid.

The chamber needs to be built in Spain, in the client's warehouse situated 45km north of Madrid.

The area available inside the warehouse is 50 meters wide, 30 meters long, and 25 meters high on the ground floor with access by the north entrance without direct access.

The desired deadline is 3 months from now.

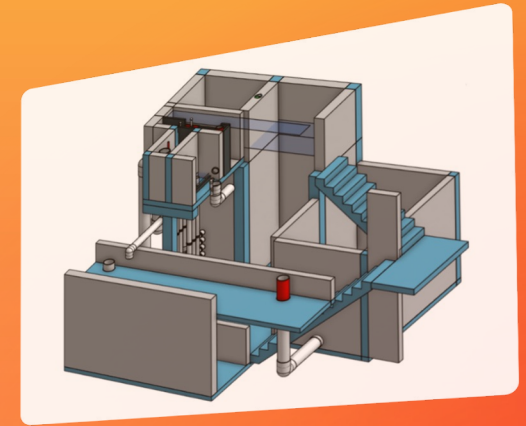

Would you like to take into account ecological impact?

Yes

Regenerate

Refrigerator Chamber

25 meters wide x 25 meters long x 25 meters high on the ground floor with access by the north entrance without direct access. Implementation in Spain, 45km north of Madrid.

Why?

Experienced team of experts

Diverse and experienced team of experts in their respective fields: IT, Design, Sales and Operations.

In house low-code platform

Cutting-edge technology intuitively designed optimizing business processes with AI Generative Building Blocks.

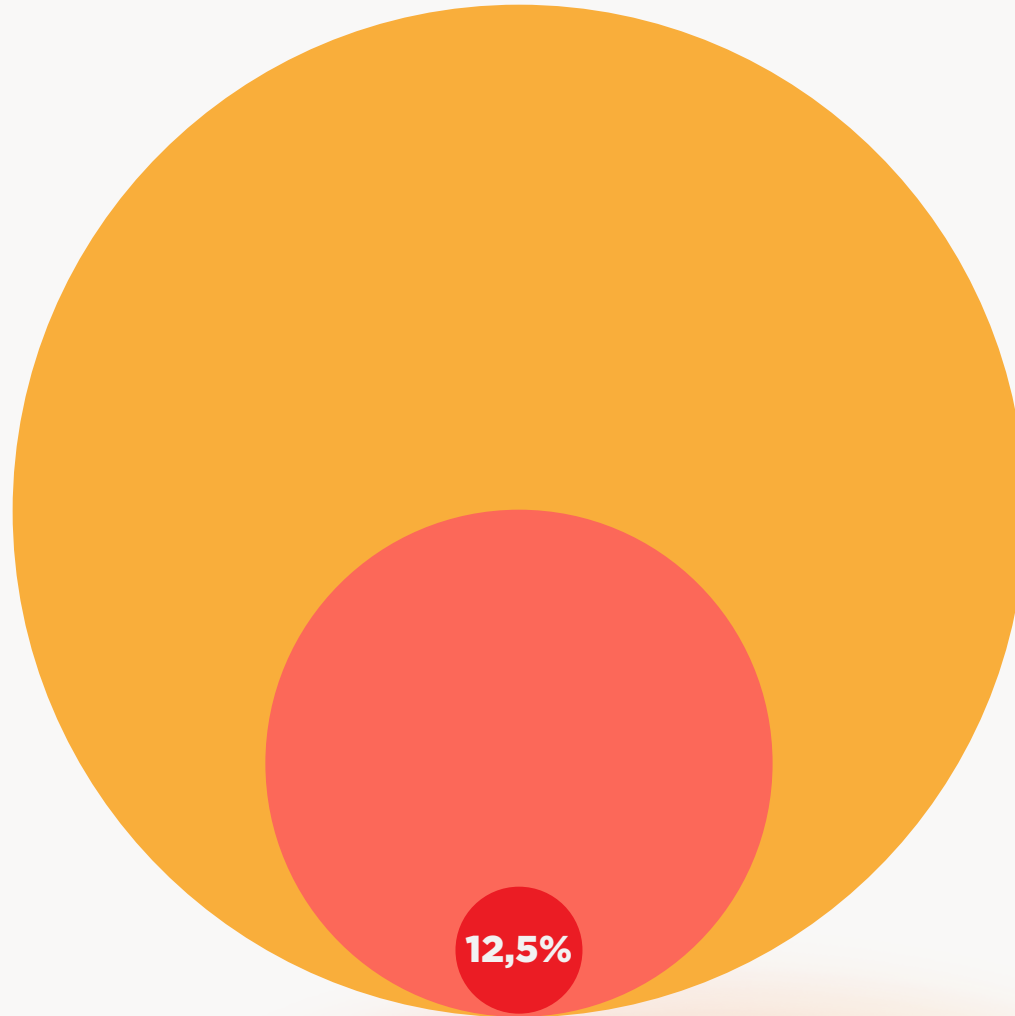

Agile Leadership

Bringing together employees, processes and technology to work in the most efficient & fun way.
